# TMX Equities Trading Notice

**Canada's largest independent dealer has taken their mutual fund trade execution to the next level.**

TSX NAVex and Raymond James Ltd. have teamed up to provide Raymond James' approximately 500 Canadian advisors the ability to service their client accounts more effectively and efficiently. Similar to ETF and stocks, the TSX NAVex platform provides discretionary advisors the ability to bulk trade mutual funds that are on the TSX NAVex platform. As the industry moves towards more model based portfolio investing, adding the ability to bulk trade mutual funds will allow advisers to spend less time on trading administration and more time focusing on their client goals and objectives.
