

# TMX Operational Notice

## Reminder: GTE Availability of the Q3 2019 Trading Enhancements

Further to Equities Trading Notices [2019-011](#), [2019-014](#) and [2019-016](#), we would like to remind all clients that the following trading enhancements will be available in the Gateway Testing Environment (GTE) on Friday May 17th, 2019. A subsequent notice will be published to announce the Production implementation date.

These Toronto Stock Exchange (TSX) and TSX Venture Exchange (TSXV) enhancements include:

- CMO+, an innovative new TSX DRK enhancement involving a randomized delay at order entry. CMO+ orders facilitate TSX DRK interactions against other participants with similar long term investment objectives.
- Introduction of the “IsDark” tag to TSX and TSXV market data feeds to allow clients to more easily quantify the amount of dark trading on TSX DRK.

Updated order entry and feed specifications reflecting these enhancements are available on the [TMX Webstore](#).

For more information please contact [TMX Market Operations](#) at 416-947-4357.
