

TMX Equities Trading Notice

Symbol Expansion Announcement

In our on-going efforts to align with global marketplace standards, an industry initiative designed to offer Canadian issuers and applicants greater flexibility in how they are identified has been set for Q4, 2020. Providing greater choice and flexibility on our Exchanges remains a top priority for TMX.

As a result, the current 8 character limitation will be increased to 12 to better facilitate four letter root symbols with multiple extensions. Please note there are no plans to modify the existing structure as a result of the change.

Structure:

ROOT(.)	TYPE(.)	TYPE DESCRIPTOR
1-4 CHARACTERS (ABCD).	1-2 CHARACTER (PR).	1 CHARACTER (A)

Further details outlining the specification changes, as well as the testing and production implementation timelines will be disseminated in a subsequent notice.
