TMX THE FUTURE IS YOURS TO SEE.

TMX Operational Notice

TMX Disaster Recovery Network Connectivity Test

In addition to the Disaster Recovery Dates for 2020 announced February 18th - Operational Notice 2020-007, TMX will be facilitating a pre-connectivity test to be held on **Saturday, September 12th 2020**.

The purpose of the pre-connectivity test is to provide clients the opportunity to establish and confirm network connectivity to the Toronto Computing Facility (TCF) DR data centre.

TMX will simulate a "disaster" at the primary data centre and failover TMX's primary trading and market data feed delivery systems to backup systems at the TCF DR site.

This activity is intended for clients to confirm DR site network connectivity. Clients are advised to verify using telnet to Unicast destinations (OE sessions; Feed Recovery Sessions). TMX does not support PING and therefore cannot be used for verification.

Pre-Connectivity Test - September 12th, 2020	
Participants Start Time	10 h
Participants End Time	13 h

As long as testing is conducted between **10:00 am to 1:00 pm ET**, no testing appointments are required.

TMX Market Operations will be available for support during the test. Participants are asked to advise the Technical Support Desk by phone or email once they have

successfully completed connectivity testing.

 ** Please provide your email to TMX Market Operations if you are participating in the DR testing **
