

Canada Climate
Law Initiative

L'Initiative canadienne
de droit climatique

Climate change poses significant risks to the economy and to the financial system, and it demands our attention today.

The Canada Climate Law Initiative (CCLI) is a national research initiative that works to clarify directors duties and fiduciary obligations related to climate change.

Through our Climate Governance Expert program, we offer free, confidential, and private presentations to directors and trustees to help Canadian businesses to consider, manage, and disclose climate risks.

During the presentation, our Expert will discuss with you the following themes:

- ▶ Risk management
- ▶ Investment strategy
- ▶ Legal duty
- ▶ Changing regulations
- ▶ Disclosure requirements

Interested? Get up to speed or level set your team's understanding.

How does it work?

Format and content

We tailor our presentations based on your needs and questions. Each board is at a different stage in its understanding of climate risk and our goal is for you to govern with confidence.

Duration

Our presentations last between 30 minutes and 1 hour and a half.

Date

Based on the availability of your board.

Chosen expert

We will pair you with the expert that best suits your board (expertise, knowledge, industry).
