About MOC: MOC is a blind closing call auction primarily for S&P Index related TSX listed securities and other TSX listed securities at TSX's discretion based on customer demand. TSX MOC allows multiple participants to trade at the closing price. MOC hidden unpriced orders are entered up to 3:40pm when the imbalance is published. Hidden limit orders are entered after 3:40pm to satisfy the imbalance along with regular limit orders at 4:00pm in a single closing price. An extension to the MOC imbalance session (to 4:10) occurs only when the MOC closing price breaches the 3% parameter relative to both the 20 minute VWAP and the last continuous trade before 4:00pm.

Participating Organizations should contact their account managers with any questions.
